## Summary

Go ahead noob! You'll break your hand before you break these keyboard feet :)

Made specifically for a Logitech k350 keyboard. Should fit other models but measure first. Super sturdy feet click on and hold keyboard a little higher than the standard feet but nice and flush with the front rubber glide pads. Keep in mind these do not fold. I built them because the factory ones were thin and just felt too squishy on typing and resting my hand. these don't have any and the keyboard sits super solid. Enjoy!
