Summary

Holds the GoPro Max 360 on a 12mm pole and stops the camera tilting to keep pole out of field of view.

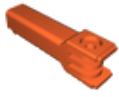

[Sports & Outdoor](#) > [Outdoor Sports](#)

GoPro Max 360 mount similar to the previous mount built for 8mm carbon square, but allows use of 12mm carbon tube to reduce vibration. Run 9mm tube, then 6mm tube inside to further strengthen the pole. Run the leash inside the tube so if it all breaks you can still keep the camera. Also now eliminates need to drill the carbon so you can reuse the expensive tube for other projects when done with this. Whilst it prints better standing vertically, it is much stronger if print horizontally.
