### Summary

To repair tent poles of the rain cover popping through

---

[Hobby & Makers](#) > [Mechanical Parts](#)

---

Designed this today and am waiting for the bike to come home so i can test it, will edit this out once tested.

We have the older version rain cover for a 2017 Urban Arrow and the tent poles have both popped through the end of the rain cover. I have attempted to stitch this shut but they have now popped through again. This is an end cap with three holes designed so the pole can be stitched to the tent cover.
