Summary

Replacement peg for Skoda hatchbacks (Octavia, Fabia etc.). This peg holds the trunk's lid/cover.

[Hobby & Makers](#) > [Automotive](#)

I've printed the model using PETG (PLA is not strong enough) on Prusa mini with 0.4mm nozzle, 100% infil.

Supports shouldn't be needed. I recommend printing the two parts separately to prevent stringing.

Installation: You first insert the peg into the hole on your trunk door and then secure it in place by inserting the second part - plug in the peg.
