It is actually not a remix because it is built from scratch with FreeCAD, including the logo, which is crated from an SVG file extracted from the PDF manual.

The insert fits into the Frantic Pandora's Box, which is available in Germany and Austria (191 mm x 191 mm).

The logo model is printed separately and fits into the opening of the insert. The gcode file of the logo has a pause to change the filament on 2.2 mm or layer 11. No MMU needed.
