## Summary

Save Crackers from a horrible fate

[Household](#) > [Kitchen](#)

I like to take a package of crackers when I golf for a quick snack. The problem was that in my soft golf bag pocket sometimes the crackers faced a horrible fate. One of the photos shows some crackers that suffered this fate (warning the photo may be too disturbing for some viewers - discretion advised).

The store bought containers I had were just too wasteful of space so I took hours and hours (a few minutes if you hold me to the truth) to design a custom cracker guard. Joy has returned to cracker land!

While it might work for small packages of cookies as well, I've only tested for crackers and cannot guarantee the suitability for cookies.

I've included the .step file for those who want to remix although it would be about as easy to start from scratch (it's just a box after all).

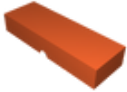

Join the cause to save crackers across the world (only to eat them later of course).
