### Summary

I made this simple adapter to fit a single coil in a Humbucker route

---

[Gadgets](#) > [Audio](#)

---

This is a very simple model that i made to fit a single coil in my Les Paul clone.

This is designed to fit the tele pickup from the Thomman kit into my Encore Les Paul.

This may not work for every single coil so YMMV.

There is a bit of space in the hole for the pickup so you can move it further towards the neck or the bridge as you please which is also why theres no holes for you do put the screws through.

The holes are 38mm apart at the shorts gap and 84mm apart at the widest.

Im uploading the f3d files aswell just incase you want to edit it to fit your guitar
