### Summary

Easy to print version of an arm guard for the ImpulseRC Apex frame

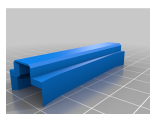

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [drone](#) [apex](#) [impulserc](#) [fpv](#) [impulsercapex](#) [fpvdrone](#)  
[impulsercapexhd](#) [apexhd](#)

Wanted an easier to print version of the original model I found on thingiverse, and since I didn't find one I just modified it by myself.

This version doesn't have weird 90 degree overhangs anymore, so no supports are needed.
