Because, we all love Honeycomb pattern!

This Keychain is perfect to show the people how elegant and detailed we can print with our printers. Oh, and it's looking great between your keys!

I made different types of files so you can choose the one you like the most.

Print instructions

You will need an 0.25mm Nozzle to print this part.

There are 4 kinds of options (if you don't use MMU2):

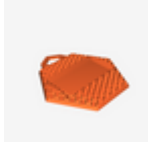

Single Part, to have the pattern just on one side.

Double Part, to have the pattern on both sides. You need to print these parts twice and glue it together.

If you want the Logo in a different color, you have to choose the files with the logo cutted off (bottompart) and print the Logo separately.

For perfect results, I reduced the print speed to 80% and printed with a brim. And don't forget the color Change!
