I was looking for cable management hooks for my cable mess under my desk and found some interesting parts and printed even some, but even before mounting one I decided to design my own one in FreeCAD. And I wanted it to be designed for fast and easy 3D printing, so I tried to make as many rounded corners as possible and as simple as possible. I hope this way you can crank up the speed on your printer ;)

If you need it for other thickness, just contact me, it's gonna be very easy to change it!

happy printing and thanks to all the other cable hooks on this platform that inspired me!
