Tags: [funnel](#) [sodastream](#) [brita](#)

There are some cases when it's hard to pour a liquid into a standard plastic SodaStream bottle without spilling. For example, if you are pouring water from a Brita filter, or juice from a screw-top carton box.

This funnel is designed to fit snugly onto the standard plastic SodaStream bottle (when printed in PLA) and provide you a wide opening to pour as fast as you want.
