Replacement part for a hook to attach a transmitter to a boom mic. Modeled after the ZMT-BOOM by [Sound Guys Solutions](#).

One side attaches to a boom arm, the other is screwed onto a transmitter holder.

Due to the shape and use case, this part is prone to breaking, that's why I needed a replacement part in the first place.

#### Print settings

My settings:

- PETG

- 0.15mm layer height
- 100% infill
- Print on its side
