Summary

The original model/design is fantastic but the towels I wanted to hang from it were a bit too thick.

Huge thanks to @LaStoKS_564957 for the original model!

The original model/design is fantastic but the towels I wanted to hang from it were a bit too thick. Using meshmixer I split the pegs from the main object, scaled the main object up an extra ~7%, and re-joined the pegs.

Printed with the same settings as per the original model, fits perfectly and holds my towels nicely!

I did enable minimal supports (see slicer preview image for example) since my printer isn't in the best shape currently. You can probably print this without supports as per the original model's instructions if your printer is better tuned than mine currently is.
