This 3D model is a rough replica of a Nintendo Switch game card that was created out of necessity. I was searching for a prop, but could not find a suitable replica of the game card. After gathering the necessary dimensions of the card, I decided to take matters into my own hands and create a 3D model myself.

The result is a design that captures the essence of the Nintendo Switch game card. The model is designed to be printed on a 3D printer.

I recognized that if I needed this prop, there were likely others out there who could benefit from it as well. By sharing the 3D model, I hope to help others who are searching for a replica of the Nintendo Switch game card for their own projects or collections.

Overall, 3D printing is a testament to the ingenuity and resourcefulness of the creators, and serves as a valuable resource for others who share their passion for gaming and collecting.

Dimensions: 31 x 21 x 3mm

I used [MarkusMcNugen Nintendo Switch Cartridge Template](#) to make the labels.
