I wanted to create a modern and unique looking vase to have around the house, and once I finished the circle one thought it would be cool to have one that weaves into it, so I made the second. You can definitely just print the circle and it would be really cool I think, or have the two of them together!

I'm almost done getting my printer together and will add a pic of the printed version when I get the chance to print it, but it should be good to go.
