updated 25. 4. 2023 | published 25. 4. 2023

Summary

A small model of a Factorio Circuit designed to fit the transport belt model.

[Toys & Games](#) > [Building Toys](#)

The Factor must grow! This is a model of a Factorio circuit to go along with the transport belts. I set these up to be printed on the MMU and is not designed to be assembled.

See the 3mf file for my personal choice of print orientation and settings.
