A shiba is my dream dog, but it will remain a dream for now. At least I have this cute low poly version on my desk to keep me company. I spent a lot of time to get the face to look just right, I hope you like it!

Supports are needed to get a good result whenever I print this with an FDM printer. Scale it up if you want it bigger, the model shown is 40 mm tall and printed on an Elegoo Saturn 2.
