### Summary

This is the first remix I've ever made, so pls go easy on me lol. This will work with Teaching Tech's flexible mount

---

[3D Printers](#) > [Accessories](#)

---

This will work with Teaching Tech's Flexible Web Cam Mount found here <https://www.printables.com/model/180148-flexible-webcam-mount-for-octolapse>

You will also need the part that snaps on the X-Axis from The Barr found here <https://www.printables.com/model/403070-sovol-sv06-x-axis-clamp>

I created this using Cura being I have absolutely no CAD skills whatsoever. I'm sure it could be improved upon, but I was pretty happy with how it turned out, so I figured someone else may want to use it.

Thanks for looking!
