My friend keeps losing his Lens Caps so I took some time and modeled him cheap replacements.

The Fit is pretty tight. I would love to add the rounded corners but I suck at 3-D Modelling and I still have my original Lenscap so jokes on you.

I printed this on my Bambu P1P in around 70 minutes with PETG. PLA should work fine as well. You can easily add a 1mm Text Cutout to personalise your lenscap.
