Summary

This lid snaps on to the 2.8 oz Nutrish wet cat food cups nice and snug. Mostly water tight and help cut down on waste!

I feed my cat half of a cup per meal, so I wanted a reusable way to keep the container covered between meals without emptying the cup into another dish.

I printed with 3 walls, 0.4mm minimum bottom layers, 0.6mm minimum top layers and 15%-20% gyroid infill; you want this to flex a little bit so that it can snap over the lip of the cup.

Drop a comment if you'd like the version without the cat face - I'm not much of an artist but I did my best with this one. Unfortunately, I didn't take into account bridging direction constraints when designing the cat face so no matter what angle you set your bridging to, there will be some longer lines that may droop a little. Still comes out looking pretty decent though!
