Summary

Made a simple soap dish for my pumice infused soap that I keep in my utility room.

[Household](#) > [Bathroom](#)

Made a simple soap dish for a pumice bar that I use in my utility room to clean up after working on cars/equipment, etc. Printed with PLA and normal 15% infill. I would probably print this with something other than PLA for long life, but for the price of PLA it's cheap enough to just print another one if it gets too water logged.
