Tags: [makita](#) [makita18v](#) [makitaholders](#)

Simple tool holder for Makita 18V flashlight, should work for other LXT tools also.

No supports needed. Print on edge as pictured.

Edit: Original for flashlight will work on other tools but the holder bumps against the inset attachment point on the tool, keeping it from fully inserting, see attached pic.

Edit2: Added a V2 option that has notches, lets tools slide on the holder further.

See pic. of V1 vs V2
