I recently bought a used lawnmower and the seller decided to remove and discard the defective drive. Spare parts are expensive and hard to come by, so I did a bit of research into 3D design and came up with my own solution.

Designed with Fusion 360 without a sample or technical drawing. Fits pretty well on my YardPro YP53-625D. Should be compatible with many McCulloch, YardPro, Partner and Husqvarna mowers.

Printed it in ASA. Will see how well it works and if it needs reinforcement/ other material.
