Key caps for mechanical keyboards for CS:GO players.

I took the model below as an example and redesigned it to be able to print it in multicolor.

<https://www.thingiverse.com/thing:3001317>

For better results, I recommend 0.25 nozzles, but it can also be printed with 0.4 nozzles. The ones in the photos are printed with 0.4 nozzle. As a filament, I recommend natural or neon filament.
