Summary

Using PETG printing, other materials are prone to breakage

[3D Printers](#) > [Bambu Lab Parts & Upgrades](#)

Tags: [bambulab](#)

Using PETG printing, other materials are prone to breakage, In addition, it is recommended to use random Z-seam alignment to improve strength. You only need to use the same screws and PTFE as the original to install.

--The wiping effect can reach the level of original accessories
But durability still needs to be observed--

*It is not recommended to use it for multi-color printing, as there is a risk of material change failure.
