updated 26. 4. 2023 | published 26. 4. 2023

### Summary

This holder mounts on the CL203's trunk handle. It requires some drilling (3 3mm holes) in the original trunk handle.

I've built this model to mount a Camera into my Mercedes Benz CL203 (Mercedes Benz C Class sport coupe from 2003).

Long Story short: I bought a radio and a Camera specifically for my car but ended up ordering a W203 by mistake (it seems like CL203 and W203 might share some parts, but not the back plate's lights...) Now that I've bought a 3D printer, I finally went through the adventure of designing the holder and installing the camera.

These are the holes that you'll need to drill in the Trunk Handle:
