Firstly a big thank you and insight into LWPLA on the Bambu Labs X1 Printer from Christopher Karcher on the PlanePrint Pilots on Facebook.

His work on the parts for those planes heavily influenced my settings for LWPLA for most other models.

<https://www.facebook.com/groups/429792227676508/user/1411250127/>

This 3MF File has been setup so you can simply load in your model and then select the appropriate filament on the AMS etc.

I worked this for replicating the Eclipson A Profile in LWPLA.
