Here there is a great laptop and iPad stand for your MacBook Air M2 (or smaller) and iPad Pro or smaller.

The interior of the stand is wrapped with TPU to soften the contact area, however PLA or PTEG will not scratch your Appel laptop.

Printing Instrcutiions:

- It does not need supports (the stand has tolerances enough to deal with hanging filament)
- Infill of 3% will be more than enough
- PLA or PTEG as you wish
- TPU interior layer are optional but worth
