[jsaux](#)

A slide-on attachment for the **JSAUX Steam Deck ModCase** that holds an Apple AirTag. It slides onto the ModCase's included strap attachment's base (remove the rubber straps first, of course). It's thin enough that the Steam Deck doesn't lie on it while flat; it more stably rests on the case's grips. Sound from the AirTag is still audible through the enclosure.

It fits quite snugly, and attaching it may require some... percussive persuasion.

Best when printed in black filament or painted black to help it blend into the case.
