Summary

Slotted piece for a phone or some other phone-shaped object that fits @ModularManiac_268187's desk organizer.

It's a thing that holds a phone or some other vaguely phone-shaped object and slots into @ModularManiac_268187's desk organizer design.

I printed mine with 8% infill and 2 perimeters at 0.4mm.

You can mirror the object in your slicer if you wish to invert the connectors.
