[phoneholder](#)

Mounting plate to align the nice phoneholder from @RCHeliGuy_95859 on the edge to an 3030 extrusion, you need two Ruthex M5S to mount the phoneholder on the plate, the plate itself has two 8mm holes, so M8, M6(incl. washer), M5 (incl. washer) will work to assemble it on the extrusion.

keep in mind, don t text and drive :-)

This remix is based on

Phone Holder for S22 normal case and two M5 bolts
