Funny Sign - "Todays good mood has been sponsored by coffee"

Complete with recesses for 10mm x 1mm magnets to make the sign easily mountable on any flat ferrous surface.

One of the files is a multi-object file to make it easy to colour the text. (Select "Xray" view in the 3d viewer to see the text on the non-"raised text", multi-object file)

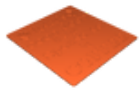

Smoothest results come from printing face down (text side down) on a smooth build plate. There are some fairly fine lines in this print, I chose "Arachne" as the wall generator type in Bambu Slicer

2 additional versions (stl & 3mf) are provided which have raised text to make it easier to print without the facility of auto-changing filaments (eg if you dont have a printer with an AMS, MMU, ETC) simply pause the print when it gets to the raised text and then swap colours.

Also included is a SVG file of the design

For more funny signs see my collection of them here - https://www.printables.com/@Spudd78_648739/collections/615193
