Build your own bridge! I introduce you the puzzle bridge building game. Made of wooden skewers and small printed pieces. The bridge with good skewers has high load capacity.

Use 3 mm wooden skewers, twine and paper to build your own bridge. Like in famous PC / tablet bridge building games.

My bridge has 80mm long skewers.

Print with PLA, layer 0,1mm, no supports needed.

If do not hold the skewers in the plastic parts, use a drop of glue :-)
