Modified to perfectly fit my Ikea Lack table.

I used these bottom cornes <https://www.printables.com/model/459251-extended-bottom-corners-for-prusa-lack-enclosure> which is extended with 2.4mm, so if you use the regular bottom corners, cut off 2.4 mm of the 3mm_plexi_gap_fill_lack_enclosure_vertical model in PrusaSlicer.

Optionally use the tool to get the best spacing between the legs and the table edges.

I also made horizontal fillers for the doors. They were made to fit together with these hinges and knobs: <https://www.printables.com/model/36286-lack-locking-hinges-knobs>
