My kid plays with this vacuum a lot. Mostly vacuum slips from his hands and falls. I remixed a design for mini vacuum cleaner. Hole in the handle was designed as 2mm wide to install a tpu printed rubber section to eliminate scracthing and make the handle little movable. If you want to print this model consider to print this rubbersection also otherwise handle not fit.

Use two bolts M3 at least 30mm

No support necessary for print

Category: Tools

This remix is based on
