Medicine Cabinet Dividers for Pleasure Way 2022 Plateau TS

A clean-room reimplementation of a design based on [Acoles' model for the 2015.5 Pleasure Way TS](#). This is based on my 2022 Pleasure Way Plateau TS. All of the dimensions are parameterised, so it should be easy to modify for any similar campervan medicine cabinet.

How to Print

PLA should be fine but you can use PETg or whatever you like.

You'll want to print a total of twelve models, four for each row in the medicine cabinet. You want two or three separators per row. I therefore

suggest printing six spacers and six separators to fill the entire medicine cabinet.

The models are oriented for printing. I print at a layer height of 0.20. Infill doesn't matter as these are thin models.
