An AKAI MPC Live II model that has been printed in 3D at a scaled size is a unique and eye-catching decoration for any music enthusiast or professional studio. The 3D printing process allows for a highly detailed and accurate replica of the original device to be created, set up the proper color change layer in your preferred slicer to get the different colors on the device.

The AKAI MPC Live II is a versatile and powerful music production workstation, and a scaled 3D printed model can be an excellent way to showcase its design. The printed model can be displayed in a music studio or home setting, or used as a gift for someone who is a fan of music production or the AKAI product line.
