Summary

This is for Disney's galaxy's edge lightsaber. It uses very minimal filament while (in my opinion) looking cool.

This is a lightsaber holder I designed a while ago that can just barely support the weight of a lightsaber from Galaxy's edge in Disney. It's a cool design that balances the lightsaber at the hilt, meaning that the lightsaber is displayed horizontally without touching or covering the blade. I managed to successfully print it without any supports on my printer.
