### Summary

A small collection of mounts designed for M5Stack cameras and other modules.

[Hobby & Makers](#) > [Electronics](#)

Tags: [mount](#) [m5stack](#)

These mounts are designed to work with M5Stack modules and the cameras. They are very simple in design but work very well.

I haven't tested the camera tripod mount yet, this one needs a square nut inserted for use on a tripod.

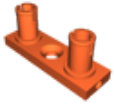

I designed them to be chained together, if needed you can insert a small piece of filament in the side to line them up and glue together.

### Model files

**m5stack-brackets\_32mm-tripod-for-timer-cam.stl**

 needs square nut to insert for tripod

### m5stack-brackets\_16mm-m5stack.stl

☐ for the smaller modules

---

### m5stack-brackets\_32mm-m5stack.stl

☐ for larger camera modules
