Tags: [shimano](#) [reel](#)

Storage box for my Shimano XTR-A LC 5500 reel spools. The diameter of these spools is 63 mm, the height is 55 mm. Remixed from the brilliant rugged box using Fusion 360. I lost count of how many of these boxes I made ;-). I tend to print the latch in PETG. The box is printed in ordinary PLA.

This remix is based on

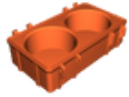

Rugged Box (Parametric)
