This design reproduces the tire rim and rim keeper for the Playmobil Safari set Jeep. This play set was released in the late 1980s I think. If your kids have the jeep and a missing or broken wheel, this may do the trick for getting your jeep back on the road.

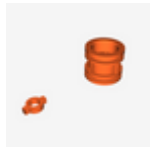

This build is for the RED jeep rims. Different versions of the sets came with different jeeps - different colors, different decals. The rims all should have fit on the same axel however.

Updated Nov 17, 2020 - stronger rim internals

Print instructions

I have problems printing models with bridges, so I set the print file to generate supports. No tire is included with this model/print - do plan on using the original tire.
