Adapter for fitting RRP mudguard to rockshox zeb fork. Tried it on 2022 model, not the 2023.

This is v2.0. It requires a zip tie for extra security and m3 bolt and washer. Uses other screws from RRP mudguard kit.

Do not torque the mudguard on too tight and you can use the printed plastic as a thread to hold it in place.

Best fitting adapter to bike first then bolting on mudguard.

This fixes the issues with the other zeb adapter on thingiverse, which does not address the angle of the bolts.

Probably best printing it in TPU or PETG rather than PLA but any will do.

v2.1 - Longer holes for nutless fitting of mudguard to adapter.

v2.2 - Thicker adapter, narrower holes for threads to grip better. Still allows nuts on back

v2.3 - Removes holes for nuts and relies on threads into material
