[baraddur](#)

Barad-dûr dice tower. Original files have to be scaled to 1000%. Alternatively you can use the custom 700%files **which have been altered to allow standard size dice to fall through and require no editing while being smaller than the original**, saving you space in the game table(22oz coffee tumbler and couple standard sized dice on cover pic to give you an idea of the final size of the 700% tower)
