A design to convert the **27cm** Sinnerlig bamboo light shade to fit a normal pendant ceiling light. Like many people, I bought this shade without noticing that it came with its own set of fixtures but I didn't want to fit all of that - I just wanted a simple shade for my light - so I printed a converter.

Simply raise the bottom part of the shade to insert the converter then manoeuver it until it reaches the top, ready to be hung. Please feel free to message me with any questions.
