### Summary

These are near-exact replicas of the original feet on a Pioneer RT 909 recorder.

These are near identical replacement feet for a Pioneer RT 909 tape recorder. I've made two sets of these for existing recorders and they fit perfectly. You'll need to print two of the feet in black PLA. Use the mirror function of your slicer to make a left foot and a right foot. Print four of the pads in black TPU—no need to mirror these. Print the feet with supports for the pad recesses.
