A friend of my son was going to cosplay Model N from Murder Drones. I got asked to print Model Ns cap badge. After some searching for references and Inkscape/OpenScad modeling, I have got a satisfactory model of the badge.

Printed dual color, Prusament Galaxy Black with Prusament Oh My Gold on top. Printed with 0.4mm nozzle. Results quite good, although bigger size of the print or smaller nozzle size would give better top finish.

Publishing both STL and OpenScad model, feel free to modify, resize etc.

P.S. The little block with a slot is to put a safety pin in the slot and glue it to the back of the badge.
