updated 15. 6. 2023 | published 15. 6. 2023

Summary

A Easy to Print - Action Figure, Printed with PLA, Inspired by Mini13, but a complete new Design.

Updated: 06/15/2023 Added step model from ETP robot, for simple changes and for remixes of the model.

Here you can find the first version of the "**ETP-Robot**", an easy to print, free moving action figure.

The model is designed to be made with a simple FDM printer.

Due to the positioning of the parts and the way they are layered during FDM printing, the parts are very stable and durable, even with PLA material.

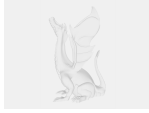

I would be very happy about your feedback and new remix variations.
Best regards
