This awe inspiring vase is made from the scales of a fire dragon! It makes for a perfect vase to display next to your printer for collecting all of your printing by-products!

The gradient color vase is original size which is 169mm x 169mm x 200mm tall. The red glitter color vase is scaled down to 50% for a desk organizer.

I used 0.2mm layers, 1 wall, 0% infill, 0 top layers, 4 bottom layers, vase mode, and around 30-40mm/s for the perimeter. I've mentioned this with some of my other vase designs; you might want to increase your perimeter extrusion width when printing single wall vases. I used 0.6mm outer perimeter extrusion width while using a 0.4mm nozzle.
