[pikachu](#)

Pokemon keychains of Bulbasaur, Charmander, Squirtle and Pikachu based on the menu sprites of Brilliant Diamond and Shining Pearl

to get the best results enable ironing and play with the settings, what worked best for me was a layer height of 0.15mm or lower, and an ironing flowrate of 8-9%. Add a color change in prusaslicer to create the multi-color effect.

If there is a Pokemon you want a keychain off leave a comment and I'll release a second batch.
