Minimalistic Benchy Shelf for Ikea Skadis

I have a slight obsession with the Ikea Skadis peg boards and put them literally anywhere. Of course there is also one at my 3D working station where I wanted to attach a minimalistic little shelf for some Benchys, so I combined daevans315's **Benchy Display Platform** and GP's **Skadis Hook** to a little shelf that holds 5 Benchys.

Please Note:

- The shelf will fit on white/coloured Skadis boards, but apparently not on the plain wooden ones as they have slightly different measurements (1)
- Even on the colored boards, the fit is quite snuggly and you may have to push a bit (2)
- Don't forget to add support to the hooks!

(1) If you have one of the plain wood ones and make a remix that fits those, please post the link in the comments and I will be happy to add it here

(2) My skadis board is attached to the same table my 3D printer stands on and therefore I wanted to make the Benchy shelf a bit shake proof. Up until now, they didn't move :-)

This remix is based on

Benchy Display Platform Prusa I3 MK3

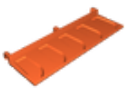

by daevans315

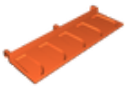

GP's Skadis Hook NG + STEP
